## **Healthy Lawns – Healthy Water**

## Use Zero-Phosphorus Lawn Fertilizer! It's the Law!

Phosphorus runoff poses a threat to water quality. Therefore, under Massachusetts Law, phosphorus-containing fertilizer may only be applied to lawn or non-agricultural turf when:

- ➤ a <u>soil test</u> indicates that additional phosphorus is needed for the growth of that lawn or non-agricultural turf; or
- is used for <u>newly established</u> lawn or non-agricultural turf during the first growing season.

Most lawns in Massachusetts do not need additional phosphorus for healthy growth.

## Look for the "Zero" to Protect Our Waters

Check the fertilizer bag for a set of three numbers representing the percentage of nitrogen (N), phosphorus (P) and potassium (K).

Buy the bag with a "0" in the middle: Zero Phosphorus!
