Re: Special Permit at 1439 Main Street  
Tractor Supply, Leicester Ma

Dear Alaa,

On behalf of my client Matt Schold of Schold Development LLC we are writing to request a modification to the approved Special Permit at 1439 Main Street in Leicester Ma.

My client would like to modify the approved stabilization method for the slopes along the south property line. The method of stabilization, which was approved, was a rip rap slope along the 2:1 slope. My client would like to temporary stabilize the 2:1 slope for the duration of two years with 12 inch of stump grindings. There is a potential buyer of the parcel and my client would like to stabilize the slope at this time and have the potential buyer finalize the stabilization once the buyer has a final design for the parcel.

Please do not hesitate to contact this office if you have any questions.

Respectfully Submitted,
