

- Maintain accurate records and Material Safety Data Sheet (MSDS) information for stored materials at your site.
- Store chemicals and hazardous materials according to manufacturer's instructions. Storage areas should be dry, cool, well ventilated, and insulated.
- Check storage areas regularly for leaks and spills. Be sure storage areas are equipped with easily accessible spill cleanup kits.

- Don't leave materials out in the open. Store them indoors in covered, sealed containers, such as a locked cabinet.
- Don't dump excess, outdated, or waste materials in storm drains or other stormwater structures. Dispose of them according to the manufacturer's instructions and local, State, and Federal regulations.
- Don't store materials incorrectly. Waste materials should be kept in secure, labeled containers.
