

Thank you very much for choosing our Warmup system, the leader in heated surfaces.

Warmup has been in business since 1990 and are leading the industry in heated surfaces. Our electric products are used for companies through the cold regions of the US, as well as Canada.

We are so pleased that you have chosen Warmup for your SkyView Estates project. Clearly this is an ideal application for our systems, and we are confident that if the system is installed following our installation guidelines that you will enjoy a ice and snow free surfaces for many years to come.

At this point, our engineering team has designed a complete CAD drawing, showing exactly how our snow melting mats would be installed in these areas. We have also provided a corresponding quote, and a 3-phase calculation, showing which mats would go to which controllers, and more precisely which contactors on those specific controllers.

We have in depth installation manuals, spec sheets, and videos for all our products. All our products are UL approved, and we have sold thousands of these types of jobs in all 50 states across the country. Warmup came to the US and Canada in 2000, and we have systems that were installed then that are still working just as they were when they were first installed. The products are made to heat up the surfaces the same for roads like this, just as they would for a sidewalk or driveway. We stand behind our products and our warranties, and our lead technician has approved this specific job as well. The snow melting mats have a 10-year warranty, but really should work 20+ years if installed correctly.

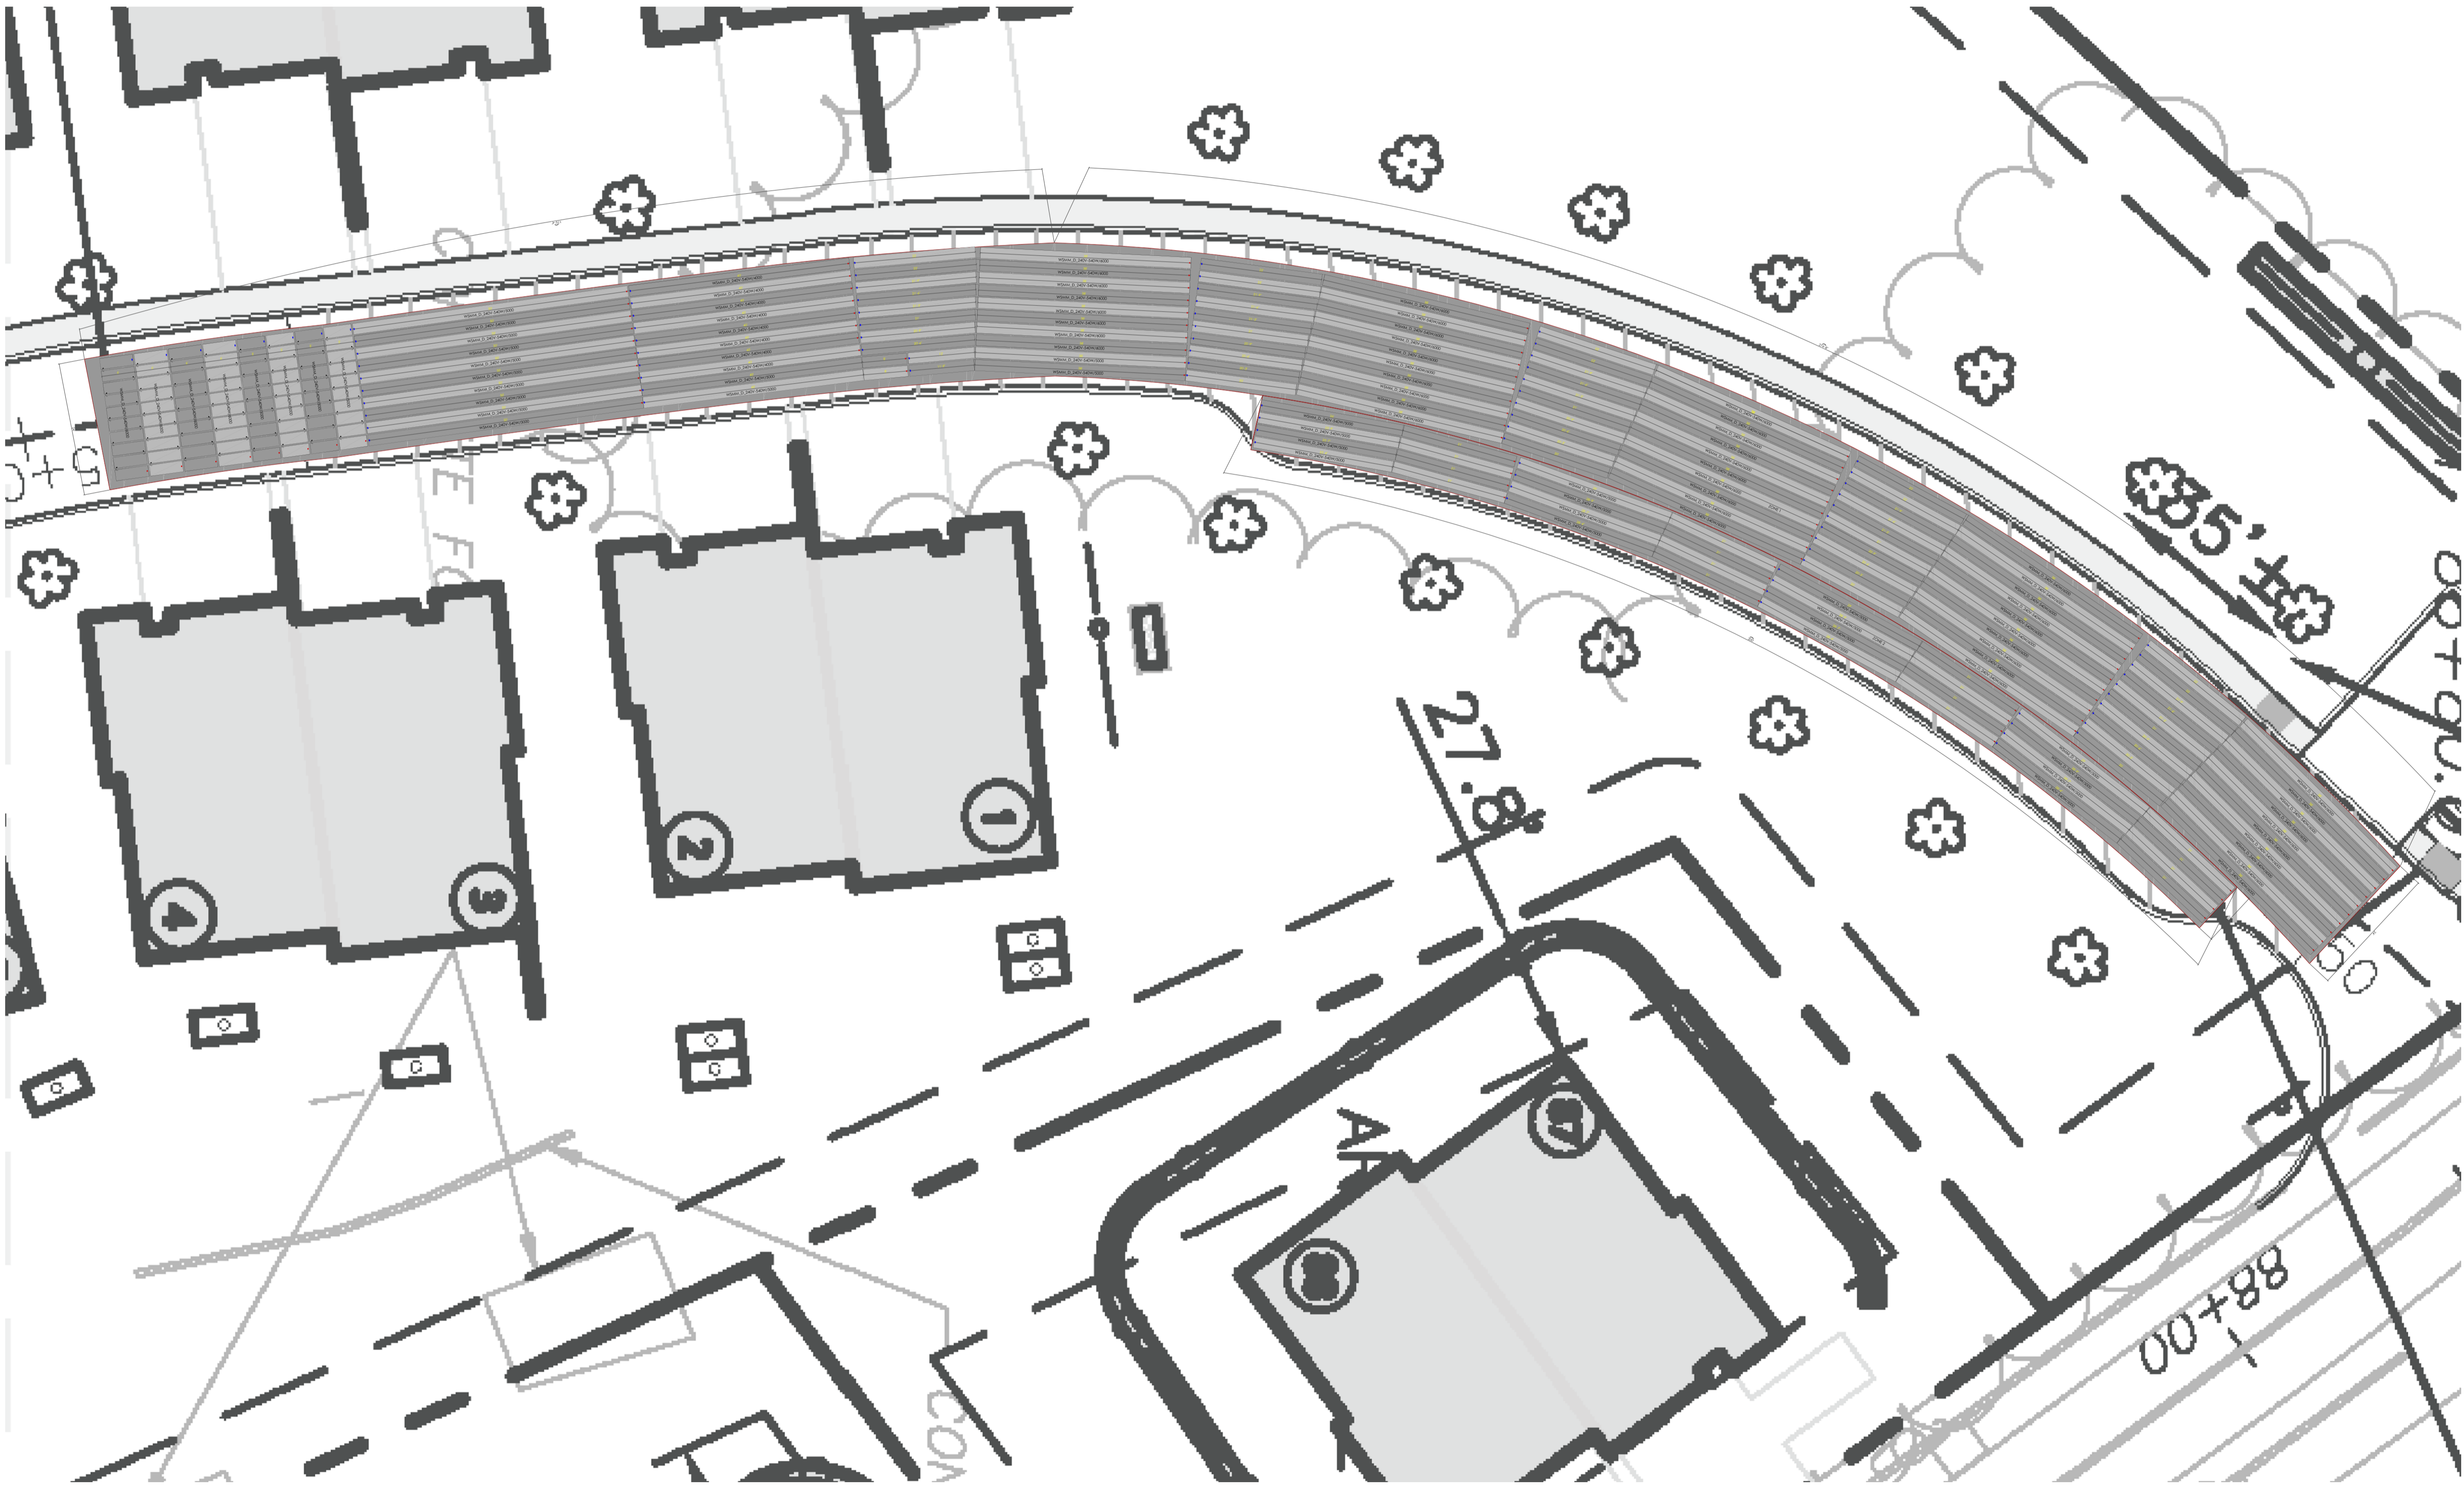

Should anyone from the Town of Leicester want to contact me for more information, please have them call me.

Thank you again for choosing the industry's best heated surfaces system.

Sincerely,

Scott Kohn
New England Regional Sales Manager

S. No.	Area Name	Heater Sizes	Length (ft)	Voltage (V)	Heater Wattage (W)	Heater Amps (A)	Mat Spacing (Inches)	Qty
